DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-6 and 9-16, drawn to frame element for a monopolar stack.

Group II, claims 7-8 and 17-20, drawn to a method for producing a fuel cell stack.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common subject matter between Groups I and II is plate elements, a plurality of recesses and/or perforations, and receiving ribs of the plate elements. The common subject matter does not make a contribution over the prior art (WO 99/57781). Accordingly, Groups I and II lack unity of invention.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically

Art Unit: 4111

point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
